

From the health of your patients, to the health of your practice,
Consa is transforming care in mental health

Consa is an AI-powered solution that automates session documentation, empowers providers and enhances patient care.

100% HIPAA Compliant

Guaranteed EHR Integration

Features

Extensible Platform

The solution has modular architecture that allows for seamless integration of new features and functionalities without compromising core functionality.

Sentiment Analysis

Best-in-class voice analytics are incorporated, helping the healthcare provider to assess the patients' emotional state.

Custom Note Generation

The solution employs a sophisticated Large Language Model (LLM) specifically trained for the mental and behavioral health context. It analyzes the conversations content, structure and dynamics to automatically generate custom report extractions.

Personalized Care Analytics

Combining sentiment analysis with session notes and action items, the solution helps to gain a deeper understanding of their patients' treatment progression.

Action Items & Logging

To-do list and action items are extracted directly from session transcripts. The application maintains a comprehensive log of these insights, making it easier for healthcare providers to track progress over time.

Friendly Interface

Our UI is designed to make it as frictionless as possible to use Consa.
